

K L I M B O

RAISING YOUR CHILDREN PROPERLY

The self-retracting step Klimbo responds to the little ones' need for independence by giving them easy access to lavatories in public restrooms.

Klimbo demonstrates a concern for young families, promotes hand hygiene and, consequently, public health.

Klimbo represents a clear advantage, both budgetary and organizational, compared to lowered sinks by ensuring an optimal use of the premises by all users.

PLACES WHERE KLIMBO IS IN DEMAND

Institutional buildings (libraries, multifunctional centers, schools, daycares, sports and recreational facilities, museums, citizens' services, stadiums) • Shopping centers • Theaters • Rest areas and service centers • Hospitals and clinics • Hotels • Fun and water parks, zoos • Restaurants • Airports, train and bus stations

ELEGANT

Fruit of a long collaboration between designers, architects and engineers • Projects an image of round contours that is both contemporary and playful • Available in the 190 **RAL classic** colors and in a **multitude of metallic finishes by Axalta Coating Systems**

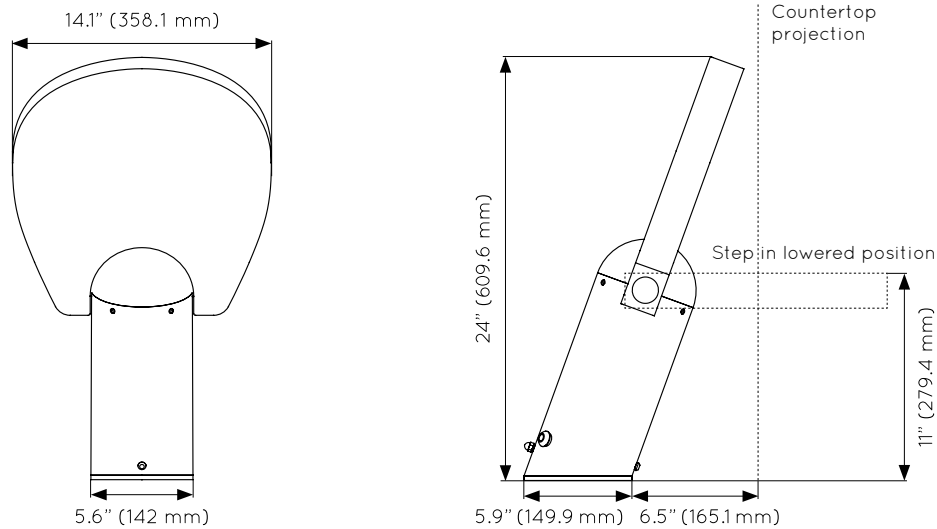

ROBUST AND SAFE

Free from pinch points and sharp edges • Imbedded adhesive tread • Load capacity of 815 lb (370 kg) • Anti-theft and vandal-resistant

EASY TO MAINTAIN

Rustproof • Encapsulated base mops won't get caught in • Resistance to cleaning products

TECHNICAL SPECIFICATIONS

Materials

Exterior components	Chassis made of aluminium T6061 finished with Axalta polyester thermosetting powder coating • By special order, all Axalta powder coatings can be applied • Imbedded adhesive tread, made from recycled tires
Interior components	Steel and aluminum coated with white lithium grease containing PTFE
Load-bearing parts	Tempered steel
Anchors	Requires two masonry anchors • Fast and easy installation in floor concrete slab • Three carbon steel masonry anchors are provided: two 3 3/4" and one 2 3/4" • Refer to the installation guide for details
